

# A **Better Solution** for Those Who Need to **Be Better Prepared**

# UNSURPASSED PROTECTION

ILC Dover designs and manufactures the suits that protect astronauts in space, so we know how to keep workers safe in harsh environments. Emergency preparedness decon teams face similar threats every day, which is why our engineers developed the **Sentinel XL® CBRN system**, the only loose-fitting powered airpurifying respirator (PAPR) designed to deliver a **CAP 2 protection rating**, with ILC Dover cartridges providing two times the service life for gases/vapors as Cap 1 cartridges. That means your decon team members have superior protection against military warfare agents, biologic threats, industrial chemical threats, and nuclear particulate threats.

# UNRIVALED FLEXIBILITY

The Sentinel XL CBRN PAPR system, which features an adjustable headband, is comfortable to wear and requires no fit-testing. And the "lay flat" design protects the system and allows it to stow easily in a backpack.

The flexibility of the Sentinel XL CBRN PAPR is evident in these additional features:

# SINGLE SYSTEM

Unlike competitive products, the Sentinel XL blower platform can be used to support both decon and infectious disease applications, reducing costs and simplifying protection equipment inventory.

#### **VERSATILE POWER OPTIONS**

The Sentinel XL CBRN PAPR operates with non-rechargeable, rechargeable, and alkaline battery packs to increase readiness. The alkaline battery packs last for 10 hours, giving emergency workers in remote locations a reliable source of power.

#### IMPROVED ERGONOMICS

Our patented Quick-Loc<sup>TM</sup> attachment system allows for quick and simple donning, while an optional backpack can double as a carrier and blower suspension system, improving ergonomics and reducing fatigue.

# Better Protection. Better Fit. Better System.

The Sentinel XL CBRN system is the most advanced, highest-performing PAPR on the market. Emergency preparedness decon teams all over the world trust our products for mission-critical protection in the harshest environments.

# **TECHNICAL SPECIFICATIONS**

SENTINEL BLOWER	
Material	Rugged, sealed nylon protective shell, with floating polycarbonate internal blow- er assembly — dual chamber provides enhanced durability
Weight	1.0 lb (without battery)
Nominal Flow Rate	195 lpm
Noise Level	<75 dB
Low Voltage Alarm	Flashing LED and buzzer
Cartridge interface	40 mm (military/NATO style) integration with integral blower gaskets
CBRN HOOD	
Configuration/design	"Lay flat" design with replaceable head strap
Material	Butyl coated fabric
Visor	Impact resistant, optical grade polycarbonate
Seams	Sewn and taped
Head Strap	Cushioned/antimicrobial with five adjust- ment positions — supports a wide range of wearers
Exhaust System	Single silicone valve — M40 style with plastic valve cover
Sizing	Single size — No fit testing required
Hose	Flexible, reinforced with butyl sheath — integral part of butyl hood.
Securing Feature	Adjustable draw cord
CHEMICAL CARTRIDGE	
NIOSH Protections	CBRN Cap 2
Package	Hermetically sealed, foil pouch, sealed
System Usage	3 each
RECHARGEABLE BATTERY PAGE	~
	Standard NiMH
Composition Configuration	Sealed external cover with blower
Comiguration	connector
Battery mount	Direct snap-on to blower
Weight	1.65 lbs
Nominal Life	8 hours
Charge/Discharge Cycles	500
Recharge Time	5 hours
ALKALINE BATTERY PACK*	
Configuration	Internal receptacles hold D cell batteries with external sealed cover
Battery mount	Direct snap-on to blower
Weight	1.95 lbs
Nominal Life	10 hours (per five Duracell® batteries)
CHARGER	·
Туре	AC/DC for sealed NiMH Battery
Current	2 amps
